

For **WATERPROOFED ROOFS OR EXISTING UPSTANDS**

PYRODÔME®

Évolution Électrique

CE
EN 12101-2
EN 1873 + A1: 2016

VERSION

Types of filling

THERMIK' RANGE:

- PCA 16
- PCA 16+
- PCA 32
- PCA 32+
- PMMA triple dome
- Acoustik'Light

Upstand

- Straight upstand
- 1.2 mm galvanised steel

THERMIK' RANGE:

- Height 360 mm with a 30 mm bituminous insulating coating

Control

- Built-in and offset mechanism for 100x100 cm and 120x120 cm roof opening dimensions (for SL250 only)
- Restricted to 80° for roof access
- Restricted to 20° for ventilation

Also available:

OPTIONS

Types of filling

- Opal PCA 16 IR
- Grey PCA 16
- Transparent PCA 16
- Insulated aluminium cover

Control

- Limit switch

Upstand

- Upstand height: 410 mm or more
- Lacquered interior (standard RAL colours)
- Colaminated sheet steel top for PVC waterproofing
- Galvanised sheet steel top for PVC waterproofing
- Bare insulation for PVC waterproofing

Other information

- 6 mm round bar or 16x16 mm 1200 joule square tube grid, galvanised or lacquered in standard RAL
- 16x16 mm security bars on opening system
- Ladder attachment bar, lacquered grey
- Support crosspiece, lacquered grey

Capping upstand

See page 6 for details.

⁽¹⁾As per §2.31 of the Th-Bat regulations.

⁽²⁾ Light transmittance LT D65 and solar transmittance SF (TST or g) as per EN 410.

⁽³⁾ Filling insulated against airborne noise R_w, pink noise R_k (environment, airport and industrial activities) and road noise R_k, laboratory-measured according to NF EN ISO 140.

Control system

We supply versatile installation kits for controlling the **PYRODÔME® ÉVOLUTION ÉLECTRIQUE** and **PYRODÔME® ÉVOLUTION ÉLECTRIQUE CAPPING UPSTAND**. These easy-to-use kits combine a core kit with a range of (mechanical, pneumatic or electrical) satellite kits. See the *Installation Kits* datasheet for a full list of our kits.

Technical diagrams

THERMIK' range

PYRODÔME ÉVOLUTION ÉLECTRIQUE PCA

THERMIK' range capping upstand

PYRODÔME ÉVOLUTION ÉLECTRIQUE PCA

PERFORMANCE

Exhaust ventilator opening: type B (open + close)

Reliability: Re 1000 + 10000 (with ventilation kit)

Low ambient temperature: T(-15°C)

Resistance to heat: B₃₀₀

Thermo-fuse set temperature: 93 °C to 183 °C

Resistance to wind load: WL1500 (1 crosspiece) / WL3000 (2 crosspieces)

Opening under load: SL250 to SL500 depending on filling

Also available in WL 3000 for dimensions < 140 x 140 cm.

Contact us for details.

COMPLIANCE & INSTALLATION

CE certified NSHEV compliant with NF EN 12101-2. (Product certification No. 0402 CPR 500029*)

The product must be fastened and sealed in accordance with the requirements defined in the applicable DTU specifications (series 40 and 43).

Maximum insulation height: as per the DTUs, the sealing flashing must extend to a height of at least 150 mm.

The waterproofing complex (substrate, vapour barrier, insulation and two-layer sealant) must be no thicker than 190 mm for an interior upstand height of 360 mm, or 240 mm for an upstand height of 410 mm.

Maximum permissible slope: 25° or 46% (see installation instructions).

Only the grid and security bar option provides guaranteed 1200 joule protection.

DoP available at www.skydome.eu

Trade name

Trade name	Filling	Upstand insulation
PYRODÔME ÉVOLUTION ÉLECTRIQUE	THERMIK' 16	16 mm PCA(Opal PCA)
	THERMIK' 16+	16 mm PCA with LUMIRA (Transparent PCA)
	THERMIK' 20	20 mm PCA (Opal PCA)
	THERMIK' 20+	20+ mm PCA with LUMIRA (Transparent PCA)
	THERMIK' 32	32 mm PCA (Transparent PCA)
	THERMIK' 32+	16 mm PCA + 16 mm PCA with LUMIRA (Transparent PCA)
	THERMIK' 3xD	Triple dome Opal upper dome + transparent interior dome + transparent lower dome
	THERMIK' 40 OPAQUE	40 mm aluminium cover
	THERMIK' ACOUSTIK' LIGHT	10 mm PCA + 6 mm solid PC

Upstand height: 360 mm

Insulation:

FOR RENOVATION AND COMPLIANCE WORKS

The **PYRODÔME® ÉVOLUTION ÉLECTRIQUE CAPPING UPSTAND** is designed to fit any type of upstand, whether for compliance reasons or to change the NSHEV's purpose **while retaining the existing upstand**.

Types of filling

THERMIK' RANGE:

- PCA 16
- PCA 16+
- PCA 32
- PCA 32+
- PMMA triple dome
- Acoustik'Light

Upstand

- Straight upstand
- 1.2 mm galvanised steel

THERMIK' RANGE:

- Height 170 mm
- Bevelled adapter upstand with 84mm heel and 40mm overlap

Control

- Pneumatic opening/closing
- Built-in and offset mechanism for 100x100 cm and 120x120 cm roof opening dimensions

Installation diagram

Options

Standard options list p.1

Upstand

- Heel width on request for fitting to existing substrate
- Upstand height on request

PYRODÔME®

Évolution Électrique

EN 12101-2
EN 1873 + A1: 2016

VERSION

Types of filling

ORIGIN' RANGE:

- Opal PCA 10

Upstand

- Straight upstand
- 1.2 mm galvanised steel

ORIGIN' RANGE:

- Height 310 mm with a 15 mm bituminous insulating coating

Control

- Electric opening/closing
- Built-in and offset mechanism for 100x100 cm and 120x120 cm roof opening dimensions
- Restricted to 80° for roof access
- Restricted to 20° for ventilation

The PYRODÔME® ÉVOLUTION ÉLECTRIQUE is an NSHEV intended primarily for smoke and heat exhaust applications. It is suitable for use on waterproofed flat roofs on all types of buildings (including public facilities, work premises and industrial buildings).

Also available:

OPTIONS

Types of filling

- Opal PCA 10 IR
- Grey PCA 10
- Transparent PCA 10
- PCA 10 + Lumira*
- Insulated aluminium cover
- PMMA double dome
- Solid PC double dome

Control

- Limit switch

Upstand

- Upstand height: 360 mm, 410 mm or more
- Lacquered interior (standard RAL colours)
- Colaminated sheet steel top for PVC waterproofing
- Galvanised sheet steel top for PVC waterproofing
- Bare insulation for PVC waterproofing
- With/without wind baffles (SD/AD)

Capping upstand

See page 04 for details.

Other information

- 6 mm round bar or 16x16 mm 1200 joule square tube grid, galvanised or lacquered in standard RAL
- 16x16 mm security bars on opening system
- Ladder attachment bar, lacquered grey
- Support crosspiece, lacquered grey

- Support crosspiece, RAL 9006

- Ladder attachment bar, RAL 9006

⁽¹⁾Relative to the horizontal, as per §2.31 of the Th-Bat regulations.

⁽²⁾ Light transmittance LT D65 and solar transmittance SF (TST or g) as per EN 410.

⁽³⁾ Filling insulated against airborne noise R_w, pink noise R_A (environment, airport and industrial activities) and road noise R_{Atr}, laboratory-measured according to NF EN ISO 140.

Control system

We supply versatile installation kits for controlling the **PYRODÔME® ÉVOLUTION ÉLECTRIQUE** and **PYRODÔME® ÉVOLUTION ÉLECTRIQUE CAPPING UPSTAND**. These easy-to-use kits combine a core kit with a range of (mechanical, pneumatic or electrical) satellite kits. See the *Installation Kits* datasheet for a full list of our kits.

ORIGIN' range capping upstand

PYRODÔME ÉVOLUTION ÉLECTRIQUE PCA

PERFORMANCE

Exhaust ventilator opening: type B

Reliability: Re 1000 + Re 10000 (with ventilation kit)

Low ambient temperature: T(-15°C)

Resistance to heat: B₃₀₀

Resistance to wind load: WL1500 (1 crosspiece) / WL3000 (2 crosspieces)

Opening under load: SL 250 depending on filling

Thermo-fuse requires a thermal detection head (not included in the product)

Also available in WL 3000: contact us for details.

COMPLIANCE & INSTALLATION

CE certified NSHEV compliant with **NF EN 12101-2. (Product certification No. 0204 CPR 500026*)**

The product must be fastened and sealed in accordance with the requirements defined in the applicable DTU specifications (series 40 and 43).

Maximum insulation height: as per the DTUs, the sealing flashing must extend to a height of at least 150 mm.

The waterproofing complex (substrate, vapour barrier, insulation and two-layer sealant) must be no thicker than 140 mm for an interior upstand height of 310 mm, or 240 mm for an interior upstand height of 410 mm.

Maximum permissible slope: 25° or 46%, if the hinge is parallel to the roof slope and Av is < 2 m² (see installation instructions).

Only the security bar option provides guaranteed 1200 joule protection.

DoP available at www.skydome.eu

FOR RENOVATION AND COMPLIANCE WORKS

The **PYRODÔME® ÉVOLUTION ÉLECTRIQUE CAPPING UPSTAND** is designed to fit any type of upstand, whether for compliance reasons or to change the NSHEV's purpose **while retaining the existing upstand**.

Filling

- Opal multi-wall PCA 10
- $U_g = 2.9 \text{ W/m}^2.K$

Upstand

- Bevelled adapter upstand with 84 mm heel and 40 mm overlap
- 1.2 mm galvanised steel
- Height 170 mm

Control

- Electric opening/closing
- Built-in and offset mechanism for 100x100 cm and 120x120 cm roof opening dimensions

Installation diagram

Options

Standard options list p.1

Upstand

- Upstand insulation including a galvanised steel protection plate
- Heel width on request for fitting to existing substrate
- Upstand height on request
